TECHNICAL SKILLS

Languages: R, Python, PostgreSQL

STUDENT PROJECTS AT WILLAMETTE

Oregon Wine | R, PostgreSQL

June 2026 – Present

- Developed an interactive spatial data visualization application using R Shiny and Plotly to analyze and display Oregon viticulture data.
- Integrated a live PostgreSQL database connection to query and serve geospatial datasets efficiently.
- Designed intuitive, user-facing filtering tools to translate complex climate and geographic variables into actionable insights for regional stakeholders.
- Interpret machine learning and statistical analysis for mixed audiences.

World Happiness Index | R, Shiny

March - May 2026

- Built a dynamic R Shiny dashboard to analyze and visualize global happiness metrics in relation to socioeconomic factors like GDP and life expectancy.
- Leveraged ggplot2 and Plotly to construct interactive, multi-dimensional charts, enabling users to isolate key correlations across regions and timeframes.

Gambling & Bankruptcy Rates | PostgreSQL, Grafana

March - May 2026

- Collaborated to build and deploy a robust ETL pipeline analyzing the correlation between legalized gambling and regional bankruptcy rates.
- Wrote optimized SQL queries and transformations to aggregate and structure highly fragmented economic datasets for analysis.

EXPERIENCE

Licensed Substitute Teacher

August 2025 – Present

Beaverton & Hillsboro School Districts

Beaverton & Hillsboro, OR

- Rapidly onboarded to new environments, systems, and stakeholder groups on a daily basis across 24+ schools in 6 school districts, quickly interpreting context and expectations with minimal guidance.
- Reduced operational disruption for full-time staff by maintaining continuity of process, protecting instructional/workflow timelines, and preventing lost productivity.

Math/Art Teacher Grades 8-12

Aug. 2020 – Jul. 2025

Lyle School District

Lyle, WA

- Redesigned curriculum delivery to function under significant technical constraints (limited/no internet access) during COVID hybrid instruction, independently producing and publishing all instructional content to YouTube.
- Served as sole subject-matter expert on district curriculum adoption committee; led research into evidence-based curriculum options and successfully advocated for district-wide adoption, standardizing instruction across all grade levels.
- Regularly revised assessment tools to improve alignment between evaluation criteria and instructional content, increasing accuracy of performance measurement.
- Built trust and rapport with a student population where 75%+ had experienced trauma, applying relationship-centered strategies to improve engagement and learning outcomes.

Math Teacher Grades 7-8

Aug. 2018 – Jun. 2020

Ketchikan Gateway Borough School District

Ketchikan, AK

- Decomposed complex, multi-step subject matter into scaffolded components, iterating delivery across multiple sessions to accommodate diverse learning needs and maximize comprehension.
- Adapted curriculum to meet the needs of classes with students having different needs and abilities.

EDUCATION

Willamette University <i>Master of Arts in Data Science</i>	Salem, OR <i>Aug. 2025 – Aug. 2026</i>
University of Hawai’i, Manoa <i>Ethnomathematics Graduate Certificate</i>	Honolulu, HI <i>Jul. 2022 – May 2023</i>
University of Alaska Southeast <i>Masters of Arts in Teaching, Secondary Education</i>	Juneau, AK <i>Jun. 2017 – May 2018</i>
California Lutheran University <i>Bachelors of Science in Mathematics</i> <i>Bachelor of Art in Fine Art</i>	Thousand Oaks, CA <i>Aug. 2010 – May 2014</i>
